

SHEARFORCE™

10

ShearForce™ 10 Hybrid-Turf Instant Armor Mat

This new, patent pending erosion control product is an immediately effective, lower cost soft armor alternative to rock riprap and other hard armor materials. The ShearForce10 Instant Armor Mat utilizes simulated turf to effectively protect, grow and permanently reinforce natural vegetation in high flow areas. Providing rock-solid armoring from day one of installation, the ShearForce10 makes it possible to use more vegetation and less rock for stabilizing channels, slopes and shorelines. ShearForce10 is available in 3 feet wide and 6 feet wide rolls for quick and easy installation.

*ShearForce10
provides immediately
effective erosion
protection under water
flow powerful enough
to wash out 24-inch
rock riprap*

ShearForce10 offers the performance of reinforced turf and large rock riprap from day one of installation.

Proven in ASTM D6460 Unvegetated Channel Testing to drastically reduce soil erosion at flow-induced shear stresses exceeding 11 lbs/sf, ShearForce10 offers more than three times the immediate channel protection of conventional TRMs.

Once vegetated, ShearForce10 permanently protects the soil base, reinforces vegetation roots and increases the long term erosion resistance of the vegetated system.

Features and Benefits of ShearForce10 Hybrid-Turf Instant Armor mats include:

- Reinforced turf performance from day one, no waiting on vegetation for effective erosion protection at shear stress > 10 lbs/sf
- Immediate to permanent erosion control equivalent to large rock riprap and other hard armor, at less than ½ the cost
- Simple installation, just lay it and anchor it over seeded area, no heavy equipment required
- Aesthetically pleasing, green grassed-in finished look
- Environmentally friendly, facilitates water filtration and infiltration
- Highly UV stable and weather resistant, for permanent strength and durability
- Easy, low-cost maintenance with standard mowing equipment

Typical Applications for ShearForce10 mats:

- High flow channels and extreme slopes requiring maximum erosion protection before, during and after vegetation establishment, including channels with constant low-flow discharge
- Drainage swales and slopes where an immediate vegetated look is desired and/or vegetation is slow to establish
- Projects in arid areas where vegetation establishment is very slow and sparse
- Overwinter project protection requiring several months of high performance erosion control without vegetation
- Moderate flow culvert outfalls, downchutes, spillways and dams
- Detention basins, lake shorelines, streambanks, canals, and levees

Recommended Design Values

ShearForce™10 Hybrid-turf Instant Armor Mat	Channels/Outfalls/Spillways/Streambanks*					Slopes	Shorelines
	Manning's n	Design Shear Stress		Design Velocity		Max Gradient (h:v)	Max Wave Height
		Cohesive Soils	Non- Cohesive Soils	Cohesive Soils	Non- Cohesive Soils		
ShearForce10 <i>Unvegetated</i>	.025 – .040	12 lbs/sf	10 lbs/sf	25 ft/sec	20 ft/sec	>1:1	<=1.0 ft
ShearForce10 <i>Vegetated</i>	.025 – .4	16 lbs/sf	14 lbs/sf	30 ft/sec	25 ft/sec	>1:1	<=1.5 ft

* Design values are derived from ASTM D6460 large-scale channel testing on loam soils under 4 consecutive 30 min flow events in 20% gradient test flumes. A safety factor (SF) of 1.25 - 2.0 may be applied in channel lining designs to account for longer flow durations, more erodible soils, and varying side-slope gradients.

Permanent Soft Armor Mats Permissible Shear Stress Ratings vs Rock Riprap

DISTRIBUTED BY:

ASP Enterprises, Quick Supply Co., Bowman Construction Supply & Cascade Geosynthetics are sister companies that serve customers from the Midwest, across the Rocky Mountains to the Pacific Northwest. Together we supply customers with a variety of environmental construction materials including erosion and sediment control, geosynthetics, stormwater management, drainage products, hardscapes and outdoor living, revegetation and soil amendments, waterproofing solutions and more.

We are full line distributors of environmental construction materials for all project types. Contact us for assistance with a project or a quote on products. From specification recommendations and project development to installation and completion, we're here to help with all of your site solution needs. Our warehouses are stocked with readily available inventory and we offer same and next-day deliveries.
